

THINKMARBLE SERVICES AVAILABLE ON G-CLOUD 11

Tuesday 2nd July 2019

ThinkMarble's Cyber Security Operator services are now available via G-Cloud 11.

ThinkMarble, a Cyber Security Operator, has announced its services are now available to public-sector bodies via the latest Crown Commercial Service (CCS) framework, G-Cloud 11.

G-Cloud 11 allows UK public sector bodies to choose and buy cloud computing services. It provides access to over 30,000 services and over 4,000 suppliers and allows access to the latest technologies at a reduced cost.

ThinkMarble are delighted to be a part of G-Cloud 11 to further safeguard against core industry challenges, such as cyber threats, data breaches and increasing compliance demands.

ThinkMarble is a world-class, component-level, end-to-end, Cyber Security Operator, offering a security package designed to protect your organisation from the latest threats and vulnerabilities. Their comprehensive approach covers people, process, technology, and legislation to create a pro-active and dynamic defence across your entire organisation.
